**Attempt all the questions.**

**1. Read the following passage and answer the questions that follow.**

THE NAME KYIRONG means "the village of happiness." I shall never cease thinking of this place with yearning, and if I can choose where to pass the evening of my life, it will be in Kyirong. When we arrived in January, the temperature was just below freezing; it seldom falls below 10 degrees centigrade. The seasons correspond to what we have in the Alps, but the vegetation is subtropical. One can go skiing the whole year round, and in the summer, there is a row of 20,000-footers to climb.

There are about eighty houses in the village, which is the seat of two district governors who administer thirty villages. We were told that we were the first Europeans who had ever come to Kyirong, and the inhabitants watched our entry with astonishment. We were quartered in the house of a farmer, which reminded me of our Austrian houses. As a matter of fact, the whole of the village might have been transplanted from the Alps, except that instead of chimneys, the roofs of the houses were decorated with prayer flags.

On the ground floor were the stables for cows and horses. They were separated by a thick ceiling from the living rooms of the family, which are approached by a ladder from the courtyard. Thick stuffed mattresses served as beds and easy chairs, and near them were small, low tables. The members of the household kept their clothes in brightly painted wardrobes, and before the inevitable carved wooden altar, butter lamps were burning. In winter, the whole family sat on the clean floorboards around a huge open log fire and sip their tea.

The room in which Aufschnaiter and I were put was rather small, so I soon shifted to the hay barn next door. Aufschnaiter carried on our unceasing struggle with rats and bugs, while I had to cope with mice and fleas. I never got the better of the vermin, but the view over glaciers and rhododendron forests made up for my discomfort. We had a fireplace in our room and were given wood to burn. We spent very little money; our provisions did not cost us more than £2 10s. a month each.

The staple food in this region is tsampa made of corn, which is made into a paste with butter tea or milk or beer, and then eaten. The Tibetans make a special cult of tsampa and have many ways of preparing it. We soon got accustomed to it, but never cared much for butter tea, which is usually made with rancid butter and is generally repugnant to Europeans. It is, however, universally drunk and appreciated by the Tibetans, who often drink as many as sixty cups in a day. The Tibetans of Kyirong, besides butter tea and tsampa, eat rice, buckwheat, maize, potatoes, turnips, onions, beans and radishes. Meat is a rarity, for as Kyirong is a particularly holy place no animal is ever slaughtered there. Meat appeared on the table only when it had been brought in from another district or, more often, when bears or panthers left part of their prey uneaten.

**A. Answer the following questions in a single sentence in your own words: [1×5=5]**

जीवनमा असफल हुन कोही पनि चाहन्नन् तर सफल हुनमा असफलतालाई पनि स्वीकार गर्न सक्नुपर्छ। खोला तर भन्न सजिलो छ तर खोला तरेर देखाउने काम श्रम र शक्तिसाध्य छ। असफल हुन्न भन्न सजिलो छ तर सफल हुन पनि निरन्तरको साधना र सुश्रुति चाहिन्छ। यसैले सफल हुन चाहने जोसुकैले असफलतासँग डराउनु चाहिँ हुँदैन। के गर्दा काम बन्छ के गर्दा बिग्रन्छ भन्ने सुश्रुतिको विकास पनि असफलतापछि नै हुन्छ। अठार पटक विश्वकै सर्वोत्कृष्ट लेखक बनेका सेठ गोडिनले सर्वोत्कृष्ट किताब निकाल्नु अघि दश वर्ष पुस्तक प्रकाशन गृहमा एक कर्मचारीका रूपमा काम गरेका थिए। यसपछि उनलाई किताब निकाल्ने धुन चढ्यो। हरेक महिना एउटा किताब निकाले। एउटा काम गरिरहेको मान्छेले अर्को काममा हात हाल्दा असफल हुने सम्भावना प्रबल हुन्छ। यसैले होला, उनले प्रकाशन गरेका १२० किताबमध्ये धेरैले उत्कृष्ट हुनु त परै जाओस् राम्रो बजारसमेत पाउन सकेनन्। व्यापार नभएका कारण उनीसित कर तिर्ने पैसासमेत भएन। यस्तो अवस्थामा पनि उनले हिम्मत भने हारेनन्। प्रत्येक असफलताले उनलाई पाठकमात्र कस्तो किताब लाने भन्ने बारे सिकाउन धेरै मदत गर्‍यो। त्यसपछि निकालेका हरेक पुस्तक सर्वोत्कृष्ट हुँदै गए। सर्वोत्कृष्ट लेखकको स्थान दिएका उनका १८ ओटै पुस्तकको अहिले ३५ भन्दा बढी भाषामा अनुवाद भइसकेका छन्। यस्तै महान् वैज्ञानिक थोमस एल्मा एडिसन पनि विद्युतीय चिमको आविष्कारका क्रममा हजारौं पटक असफल भएका थिए। “हजारौं पटक असफल हुँदा पनि तपाईंले किन हार मान्नुभएन?” भन्ने प्रश्नको उत्तरमा उनी भन्ने गर्थे, “म असफल भएको थिइनँ, केवल हजारौं गलत बाटो चुनेको थिएँ।” यसर्थ हरेक असफलता नै सफलताको प्रेरक पनि हो।
